

Angular Assignment Cakes Management Application (Choco Treat)

A Deep Dive into the User Interface and Functionality

By : Anush Priya T

Welcome to Choco Treat!

- Choco Treat is a web application designed to provide users with access to dessert recipes and potentially e-commerce features.
- The application focuses on chocolate-based treats but extends to a broader range of desserts.
- This presentation analyzes the user interface and functionality of Choco Treat to identify strengths and potential areas for improvement.

Authentication and Registration

Sign-up:

- Form with "Name," "Email," "Password," and "Confirm Password" fields.
- "Confirm!" button for account creation.

The screenshot displays a web browser window with the address bar showing 'localhost:4200'. The page has a solid purple background. In the top right corner, there are five circular icons containing the letters 'C', 'H', 'O', 'C', 'O'. Below these, a toggle switch is present, with 'Log in' on the left and 'Sign up' on the right; the 'Sign up' option is currently selected. Centered on the page is a white rectangular form titled 'Sign up'. Inside this form, there are four input fields: the first contains 'Vijay', the second contains 'vk@gmail.com', the third contains six dots, and the fourth also contains six dots. Below these fields is a white button labeled 'Confirm!'. The browser's taskbar is visible at the bottom, showing various application icons and the system clock indicating 21:10 on 30-03-2025.

Login:

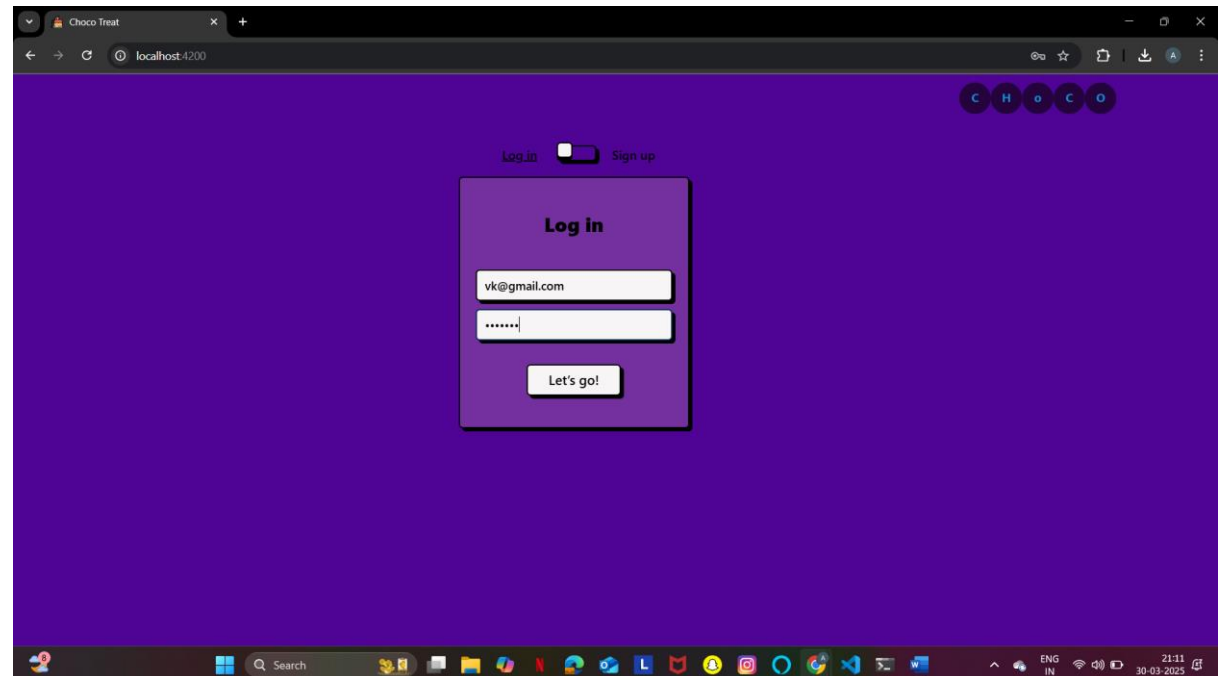

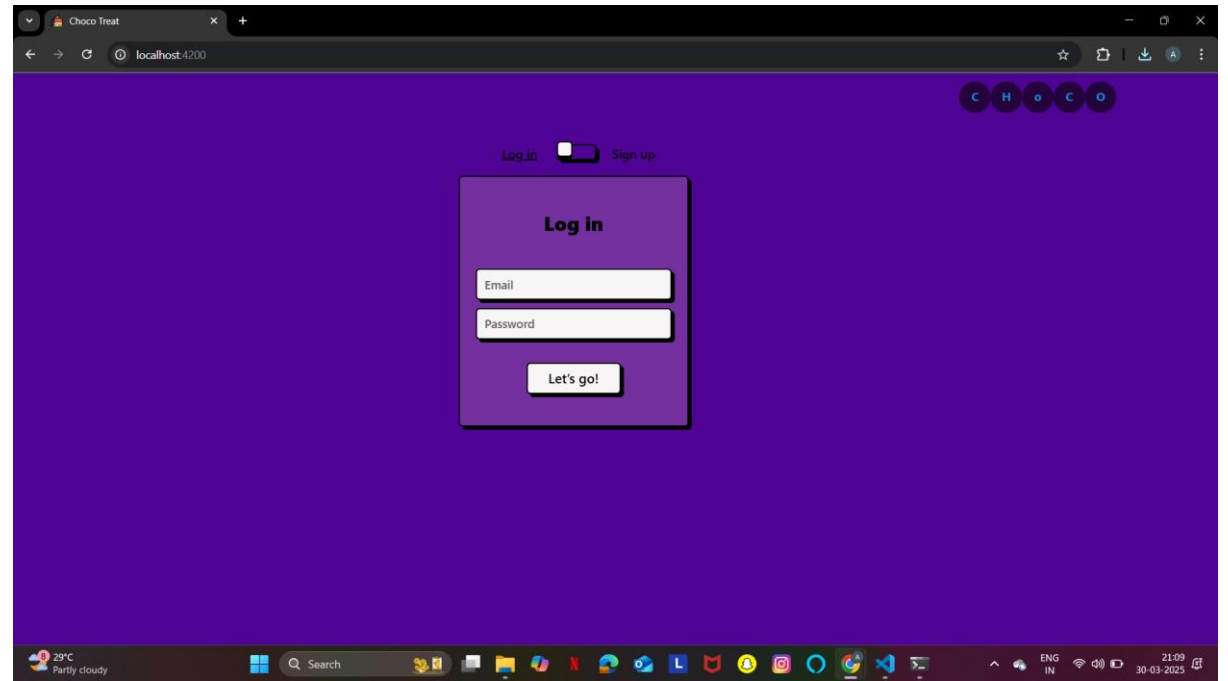

- Simple form with "Email" and "Password" fields.
- "Let's go!" button for submission.

Toggle Switch:

Allows users to easily switch between login and sign-up forms.

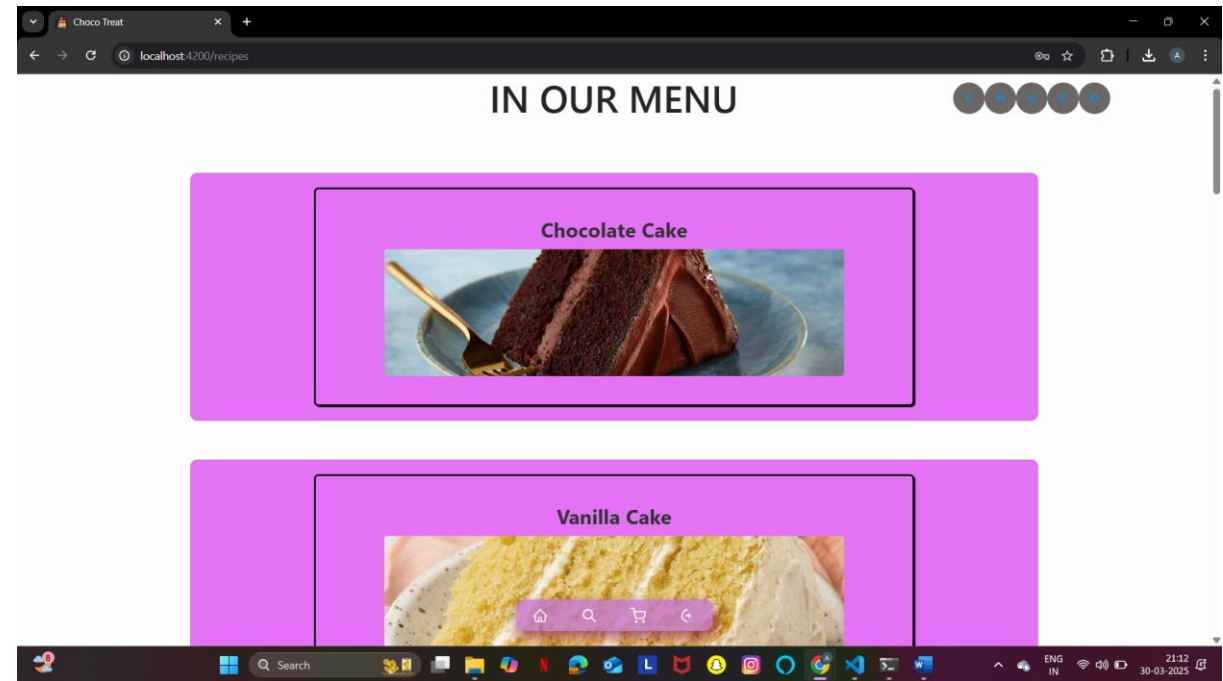

Observations:

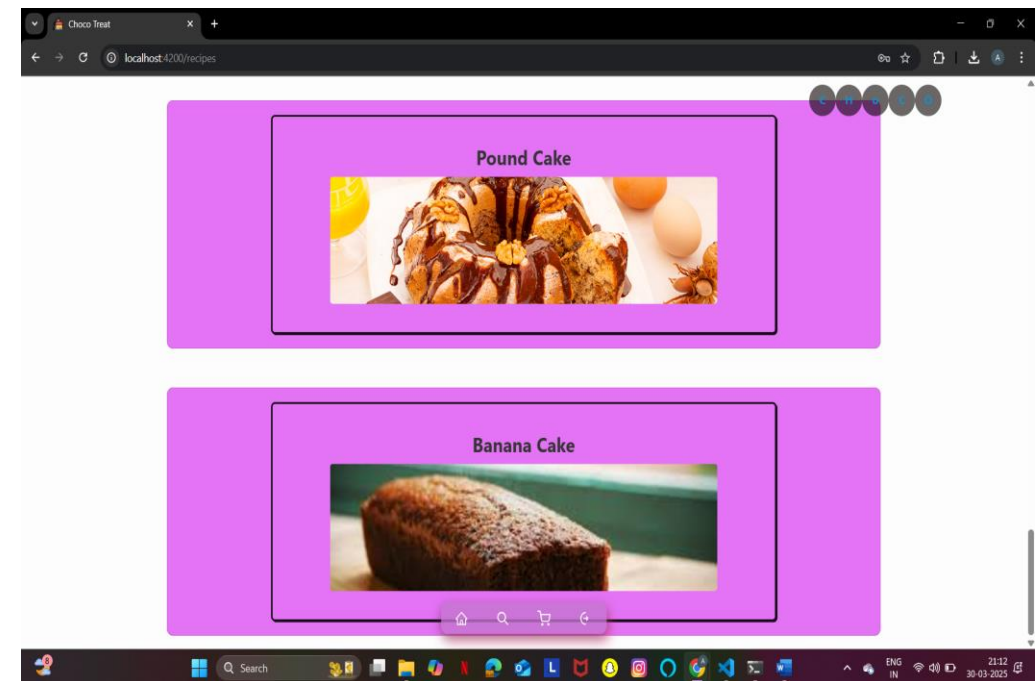

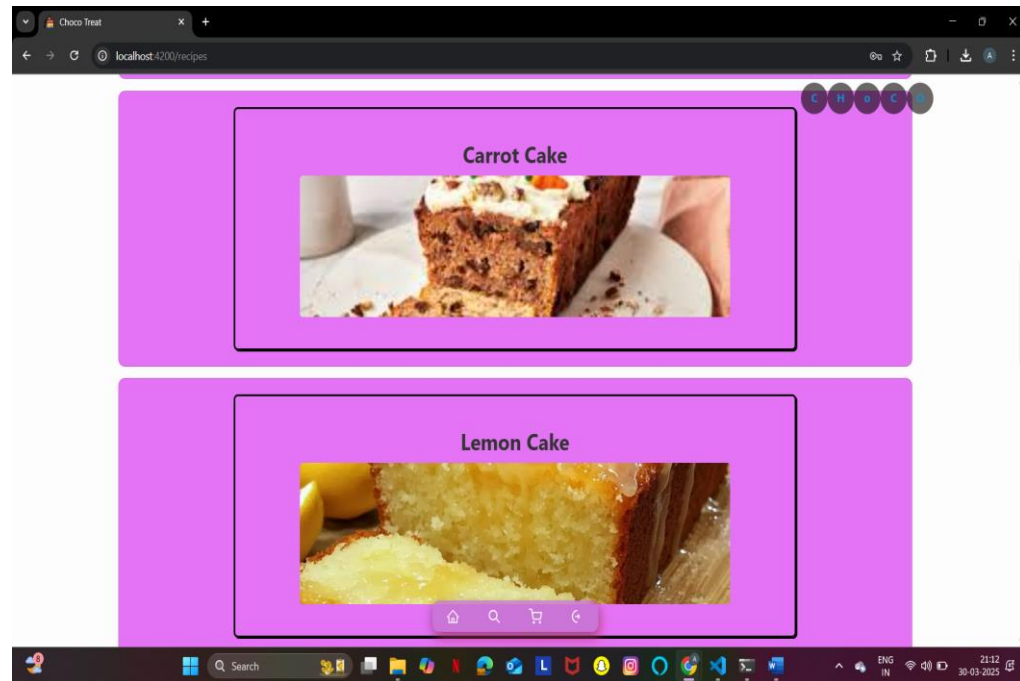

- Basic and functional design.
- Potential for adding password strength indicators and social login options.

Exploring the Menu

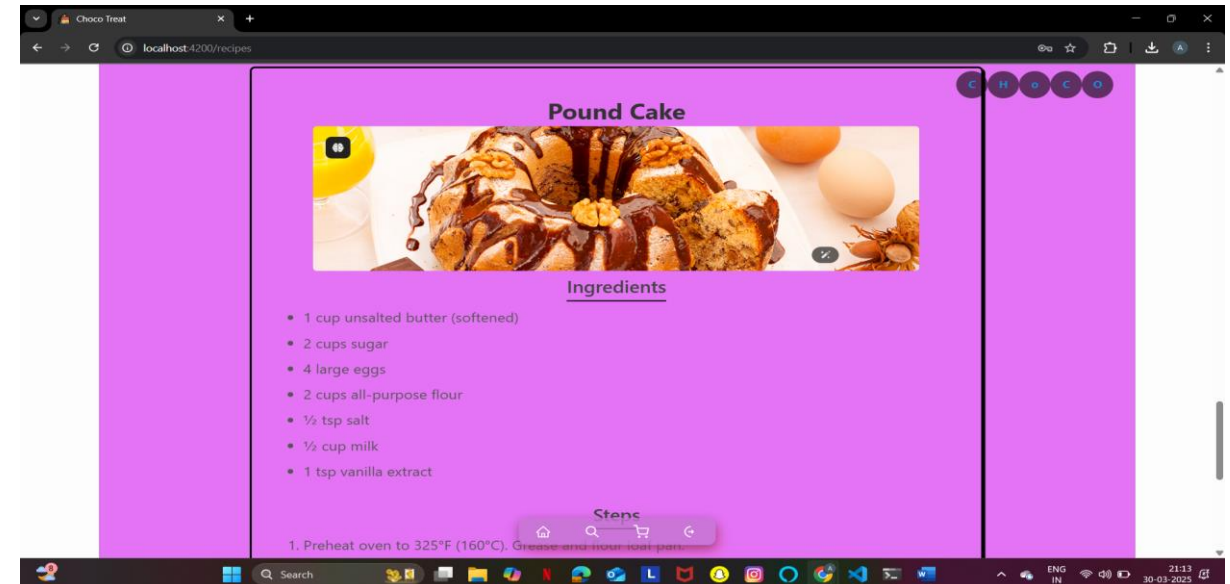

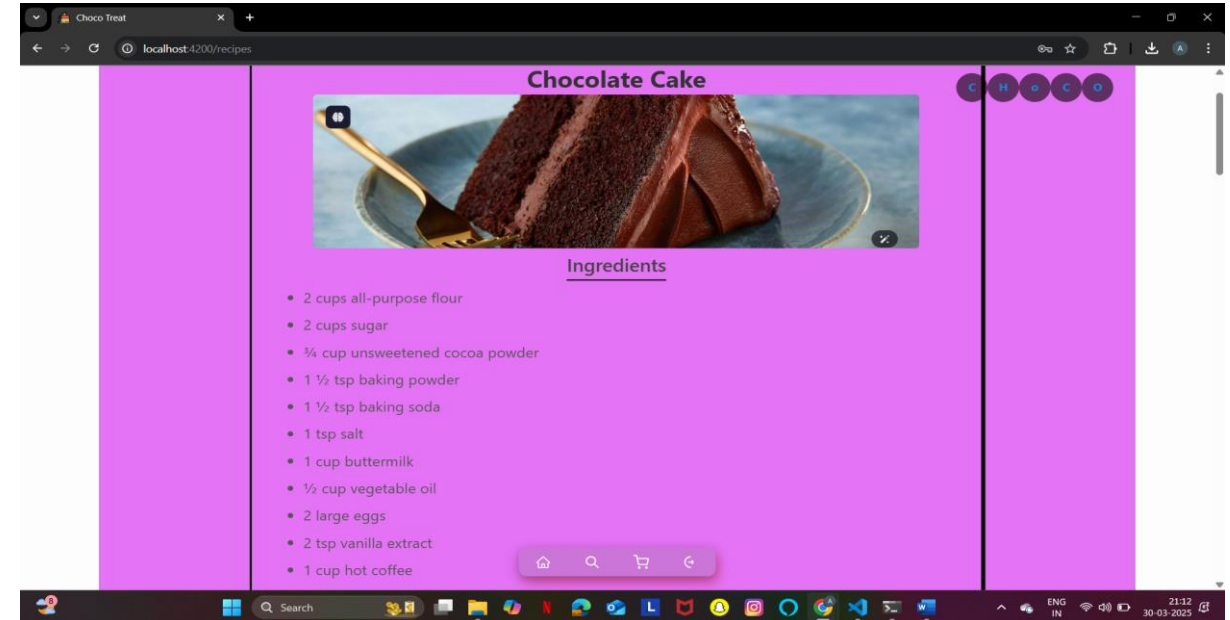

- Menu Page:** Displays available recipes with images and titles.
- Recipe Page:** Provides detailed recipe information, including ingredients and potentially instructions.
- Interactive Elements:** Search, Add to Favorites, Add to Cart, Buy buttons are present for each recipe.
- Observations:**
 - Visually appealing presentation.
 - Potential for adding filtering and sorting options, user reviews, and ratings.

Finding Your Favourite Treats

- Dropdown Search:** Allows users to select a recipe from a list (e.g., Chocolate Cake, Bundt Cake).
- Search Results:** Display detailed recipe information, including ingredients.
- Observations:**
 - Simple dropdown-based search.
 - Consider implementing a more robust search bar and visual search options.

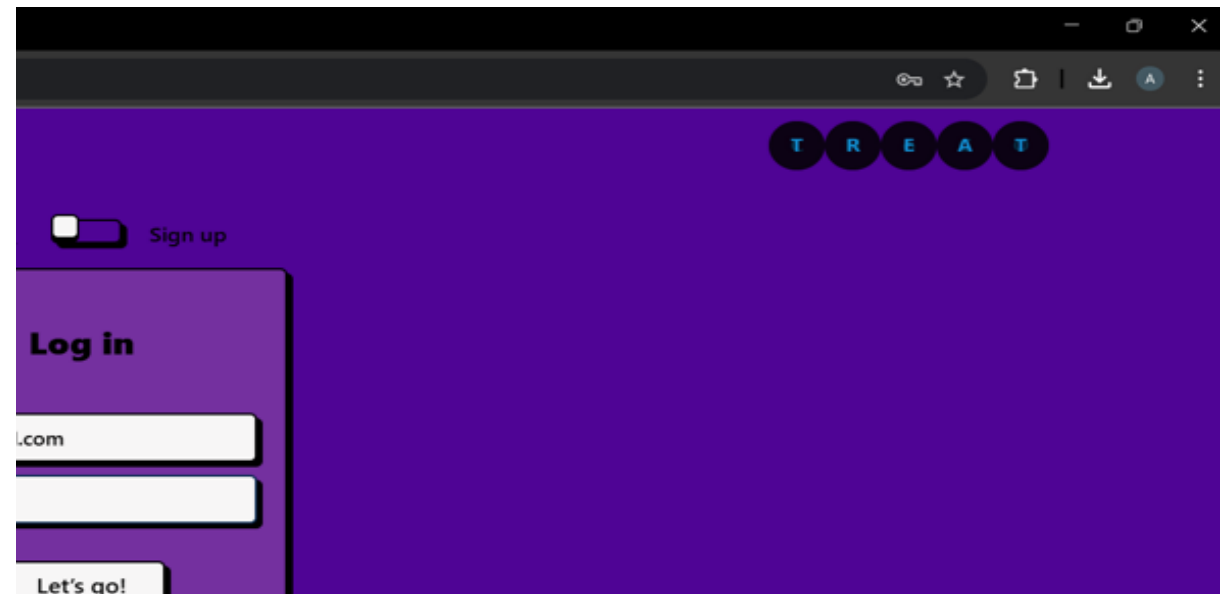

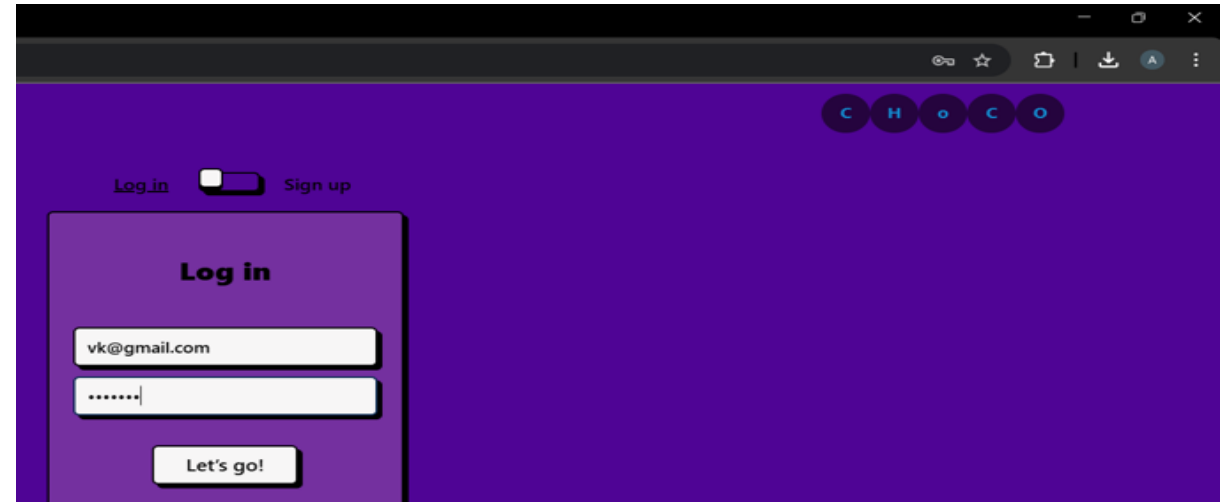

The "CHOCO" to "TREAT" Transformation

The logo in the top right corner changes from "CHOCO" to "TREAT" when the user interacts with it.

Observations:

- Potential for hidden functionality or an Easter egg.
- Suggests the application's broader focus on treats beyond just chocolate.

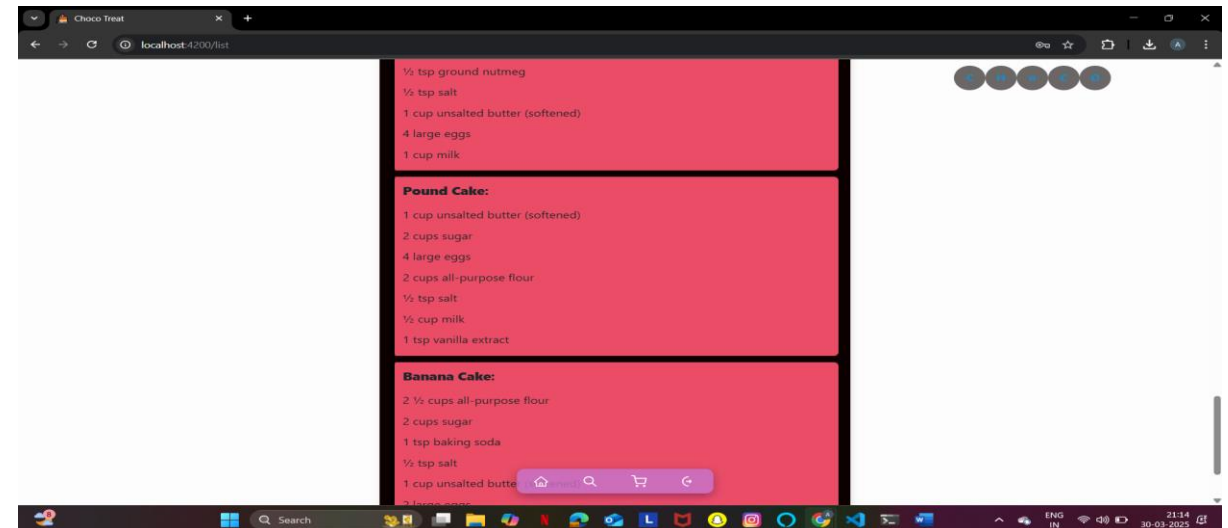

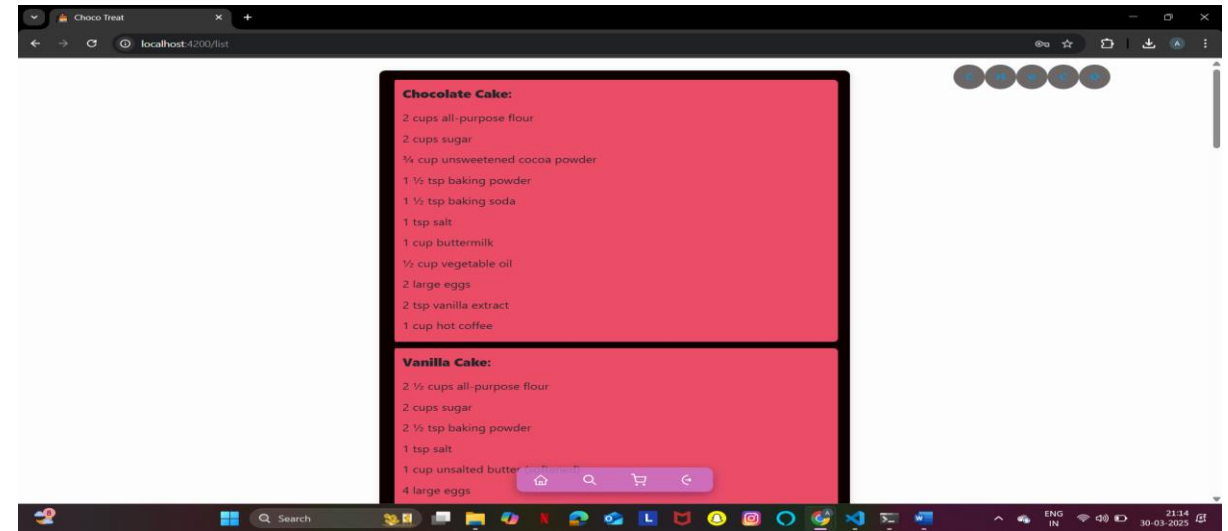

Compact Ingredient Lists

- Displays ingredient lists for multiple recipes in a compact format.
- Uses a red background to distinguish each recipe.

Observations:

- Useful for quick comparison or shopping list generation.
- Consider adding a dedicated shopping list feature.

Key Takeaways and Future Directions

Key Takeaways:

- Choco Treat provides a user-friendly interface for browsing and interacting with dessert recipes.
- The application offers both chocolate-specific and general dessert options.
- Interactive elements enhance user engagement.

Future Directions:

- Enhance search functionality.
- Add user reviews and ratings.
- Implement social login options.
- Consider adding a shopping list feature.
- Explore potential functionalities related to the interactive logo.
